

(c) The total production to count (in pounds) from all insurable acreage on the unit will include:

(1) All appraised production as follows:
(i) Not less than the production guarantee for acreage:

(A) That is abandoned;
(B) Put to another use without our consent;

(C) Damaged solely by uninsured causes; or
(D) For which you fail to provide production records;

(ii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 13(d));

(iii) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested;

(2) All harvested production from the insurable acreage in the unit;

(3) All harvested and appraised production lost or damaged by uninsured causes; and

(4) For processor contracts that stipulate the amount of production to be delivered, all harvested popcorn production from any other insurable unit that has been used to fulfill your processor contract applicable to this unit.

(5) Any production from yellow or white dent corn will be counted as popcorn on a weight basis and any production harvested from plants growing in the insured crop may be counted as popcorn production on a weight basis.

(6) Any ear production for which we cannot determine a shelling factor will be considered to have an 80 percent shelling factor.

(d) Mature popcorn may be adjusted for excess moisture and quality deficiencies. If

moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by 0.12 percent for each 0.1 percentage point for moisture in excess of 15 percent. We may obtain samples of the production to determine the moisture content.

(2) Popcorn production will be eligible for quality adjustment if, due to an insurable cause of loss that occurs within the insurance period, it is not merchantable popcorn and is rejected by the processor. The production will be adjusted by:

(i) Dividing the value per pound of the damaged popcorn by the base contract price per pound for undamaged popcorn; and

(ii) Multiplying the result by the number of pounds of such popcorn.

14. Late Planting

Late planting provisions in the Basic Provisions are applicable for popcorn if you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

15. Prevented Planting

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.
